

OBITUARIES

Wanda Bernice Frazier

Curator of the Herbarium in 1984 in order to become Head of the Biology Department, VSC comprised more than 30K accessions.

Dr. Faircloth was a generalist of the Old School, who believed that broad training in biology and the ancillary sciences was essential. More than once, he lamented the increasingly narrow focus of teaching and research in biology. First

and he was active on various other boards and committees of local civic importance.

In a 1995 resume, Dr. Faircloth cited his research interests as vascular flora of the Atlantic-Gulf Coastal Plain, biosystematics of *Ophioglossum* in the United States, biosystematics of *Baptisia arachnifera* Duncan, and ecosystem

ecosystems of short-sighted, selfishly motivated, and ignorant human actions. Congruously, Wayne's son, Wilson, earned the B.S. in Botany from the University of Georgia in 1997 and was awarded the Ph.D. in Weed Science from Auburn University in 2004, with *Imperata cylindrica* the subject of his research.
